

Juliette Balconies

Juliette balconies with a variety of options, designed to coordinate with our balustrade systems, offering streamlined installation with our all-new modular bracket system.

JULIETTE BALCONY CREDENTIALS

- > **Modular bracket** installed with the brickwork, allowing for **faster** and **seamless installation** times
- > Designed to meet **structural loading** requirements of **BS6180**
- > Juliette's available with a **variety of infills** and finishes including **glass** and **aluminium vertical bars**

JULIETTE BALCONY INSTALL SEQUENCE

- 1) Brickworker builds the **support bracket** into the brickwork during **construction at pre-determined locations**
- 2) Building works, doors and other façade works are complete and the Juliette Balcony is **hooked** over the **protruding stud fixings**
- 3) Using a **dome nut** and **lock nut** on the **studs**, the Juliette's are adjusted to suit the **tolerances** in all three directions resulting in a **flush finished secure solution**
