

ELEVATED CHANNEL

BCM elevated channel is supplied in 3m lengths with internal channel dimensions of 160mm wide x 135mm deep. It comes complete with 3m lid which can be held in place with an interlocking H piece or locking bracket (see spec sheet 3). The system is very easily handled and installed as a three metre length complete with lid weighs only 38kg. Elevated channel is complemented by a full range of accessories:

- Channel Bends - two 45 degree bends combine to produce a full 90 degree angle.
- 'T' Piece - simple, effective and easily installed the T Piece comes with a one piece lid.
- Joint Box - BCM's joint box has been developed to enable a joint to be made without interference to the cable.

Wall thickness nominal 10mm

All wrap over lids are 20mm wider than the chamber

PRODUCT CODES

BCM Part No.	Rail Industry Cat. No	Product	Length
BCM C/04/03	4/090770	elevated cable channel	3 metres
BCM C/04/04CL	4/090771	elevated cable lid	3 metres
BCM C/04/05	4/090775	elevated channel bend	1.5 metres
BCM C/04/06CL	4/090776	elevated channel bend lid	1.5 metres
BCM C/09/03	4/090782	T Piece for elevated channel	1.6 metres
BCM C/09/04CL	4/090783	lid for elevated T Piece	1.6 metres
BCM C/09/01	4/090780	joint box for elevated channel	1.9 metres
BCM C/09/02CL	4/090781	lid for elevated joint box	1.9 metres

STEELWORK

Purpose made supports for use with BCM GRC elevated channel consists of a stake and bracket manufactured from heavy duty galvanised steel. The standard bracket is 1.4 metres high and it can be adapted to carry multiple channels if required. The system also includes wall brackets for station areas and tunnels. Special support systems can be designed and manufactured to order.
