

GROUND CHANNEL

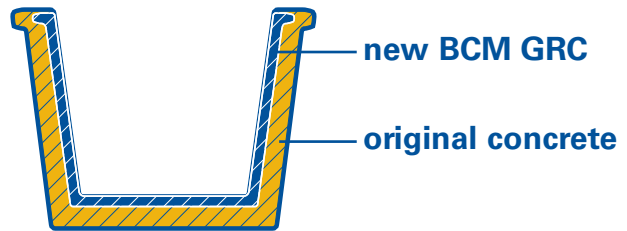

BCM ground cable channel is available in standard two metre lengths and in box sizes ranging from 100mm up to 350mm. Approximately one fifth of the weight of precast concrete yet strong enough to overcome the possibilities of breakage. The channels lightweight characteristics means that a four man team can install GRC channel at twice the speed of traditional concrete. Easier site delivery and movement to trackside also help cut time and labour costs.

Wall thickness nominal 10mm

All ground channel sizes can also be installed in elevated situations on stakes and brackets which gives continuity of size with your concrete ground channel.

Size continuity with internal dimensions:
